  <p>Web development is the work involved in developing a website for the
Internet (World Wide Web) or an
      intranet (a private network). Web development can range from
developing a simple single static page of
      do this by using a variety of coding languages
  </p>
  <p>
      Web development is the building and maintenance of websites; it's the
work that happens behind the scenes to make a website look great, work fast
and perform well with a seamless user experience.

Web developers, or 'devs', do this by using a variety of coding languages. The
languages they use depends on the types of tasks they are performing and the
platforms on which they are working.

Web development skills are in high demand worldwide and well paid too - making
development a great career option. It is one of the easiest accessible higher
paid fields as you do not need a traditional university degree to become
qualified.

The field of web development is generally broken down into front-end (the
user-facing side) and back-end (the server side). Let's delve into the details
